

# Distance Sampling

## Estimating Abundance of Biological Populations

S.T. Buckland, D.R. Anderson, K.P. Burnham, and J.L. Laake

On-line Book

(United States Download Site)

*Distance Sampling* was first published in 1993 by Chapman and Hall, and was subsequently reprinted in 1999 by the authors. It has now been superseded by a new book, [Introduction to Distance Sampling](#), which is available from Oxford University Press. As a service for those not able to purchase copies of the new book, we have archived an electronic copy of the 1993 book at this web site. However, we recommend use of the new book whenever possible.

To facilitate downloading, the book has been divided up into several files, approximately one for each chapter. Because the files are quite large, we recommend you use the "Save Target As..." or "Save Link As..." option in your browser to save each chapter to your local machine so that you will not have to download them again. The total size of the files is approximately 30 MB.

The files are saved in Adobe Acrobat format (pdf). To read them you will need the free Acrobat Reader, which you can download from the [Adobe Acrobat Site](#).

Please cite the book as follows:

Buckland, S.T., Anderson, D.R., Burnham, K.P. and Laake, J.L. 1993. *Distance Sampling: Estimating Abundance of Biological Populations*. Chapman and Hall, London. 446pp.

### Table of Contents

- [On-line Searchable Index](#)
- [Contents, Forward and Preface](#)
- [Chapter 1. Introductory Concepts](#)
- [Chapter 2. Assumptions and modelling philosophy](#)
- [Chapter 3. Statistical theory](#)
- [Chapter 4. Line transects](#)
- [Chapter 5. Point transects](#)
- [Chapter 6a. Extensions and related work. Sections 6.1-6.5.](#)
- [Chapter 6b. Extensions and related work. Sections 6.6 to 6.13](#)
- [Chapter 7. Study design and field methods](#)
- [Chapter 8. Illustrative examples](#)
- [Appendix and Bibliography](#)
- [Index](#)
- [Errata](#)
